Any questions? Ken’s Beverage, Inc. 630-428-5830

- **VERY IMPORTANT** Use boosted, unregulated unfiltered water for the RO system. See the correct water path below.
- Mount the RO System securely to the wall with approved fasteners.
- Run and secure a drain line to a floor drain. It does drain when it is making water. Do not remove or shorten the red restrictor drain line that is on the filter, just extend it with the red tubing provided.
