

## ALPHA™ Automatic Brewing Systems with FreshTrac™ Technology

### The Curtis ALPHA™ Brewing System with FreshTrac™ technology... beyond evolutionary, it's revolutionary.

The Curtis ALP3GT™ Brewing Systems with FreshTrac™ technology, a revolutionary way to keep decanters ready to serve freshly brewed coffee. FreshTrac™ includes a flashing, visual indicator to monitor the freshness of coffee right from the point of brewing. This technology eliminates the need to manually manage coffee freshness using hanging timer rings or marking devices. FreshTrac™ makes it simple and convenient for managers and crew to ensure they are serving a Gold Standard Premium Roast cup of coffee, every brew.

### ALPHA G3 BREWER FEATURES

**G3 Digital Control Module** provides precise control over all aspects of brewing in an intuitive, easy-to-operate system. Easily adjust time, volume, temperature, brew functions and more from the front of the brewer.

**Built-In Fine-Tuning Brewing Modes** pulse brew for enhanced gourmet flavor extraction.

**On-Board Self-Diagnostics** automatically notifies operator of preventive maintenance needs or service requirements.

**Energy Save Mode** reduces energy consumption when brewer is idle.

**Factory Set** for out-of-the-box operation.

### FRESHTRAC™ FEATURES

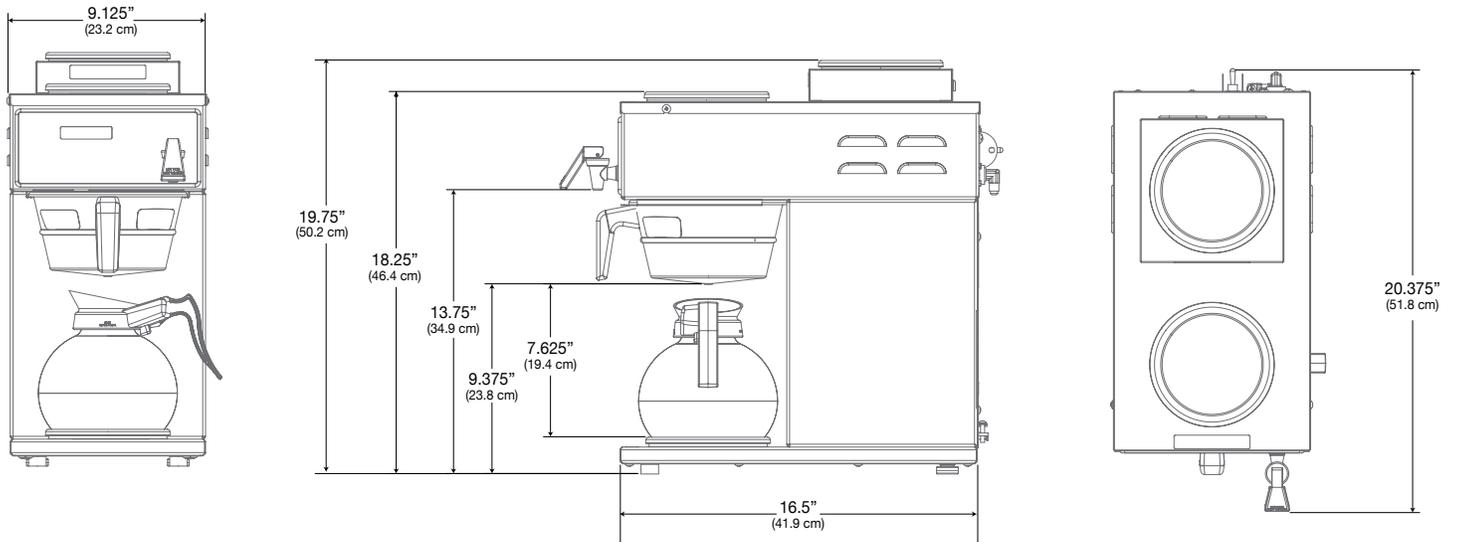

**Silent, Visual Alarm** green, red and yellow indicator lights provide a simple, intuitive way to monitor coffee freshness.

**Dishwasher Safe** FreshTrac™ decanters,, including tracking receivers can be fully submerged without damage.

**Fully Automatic**  
FreshTrac™ starts with every brew cycle.
