McCann's Ultimate Manifold Water Distribution Panel

McCann's is introducing a new water management/distribution system. The product allows for a clean and efficient in-store solution to the need to direct the water supply to a ever growing number of destinations. Inquire about McCann's part number 15-3364.

Features:

- Takes the guess work out of modifying plumbing requirements to facilitate CBB upgrades.
- Each inlet and outlet is labeled with specific equipment destination.
- Barbed manifold inlets and outlets are provided per specified equipment line size.
- Stainless steel panel and manifold construction with brass ball valves provides for a long lasting and easily maintained system.
- Compact size (24" x 24") can be mounted in either direction on 16" centers.
